And the city needs to look ahead as much as do its citizens. It is greatly in municipal building. It must have one that will be equal to the demands of generations to come. So the site, as well as the architectural features, must be chosen with all forethought and care. Happily the forefathers of the town, though shortsighted in some respects, were conspicuously fortunate in this particular. They located the old City Hall right where the municipal interests will centre to the end of time, so far as any human probabilities indicate, and on that site the new building should be erected. It furnishes all necessary space and all opportunity for architectural display, and meets so exactly the other requirements of the case that there is cause for wonder in every moment of hesitaucy over its selection by the New City Hall Commission.

> No Such Thing as Wife Management. To the Editor

There's no such thing as managing a wife: that is, no recipe for it. In a truly happy marriage a wife will be managed without any effort on her husband's part. Make your wife truly happy. Let her feel your interests hers. Don't let her be your slave. But just as soon as you look for a recipe for wife-mainagement just so soon your wife will become unmanageable. Women like to feel that their husbands strive to make them happy. There are many ways to do so, but don't let your wife think that it is a trial for you.

The Loved Husband Is a King. o the Editor

No matter how humble a man may be, he is king if he has a loving wife at home. A loving and congental wife is God's greatest gift to man. She labors for his happiness, she clings to him as the vine to the oak; she is plete with woman's suffering for her husband. During the sunshine and calm her nobleness, her heroic spirit of love and devotion has been dormant and unsuspected, but in the storm it shines out like a beacon for bim across the troubled waters, and by its powerful light leads him back safely to the shore. Knowing her resources then and her capabilities (if for no other reason), his sole object should be to make ner happy. He thus creates his own happiness, Gentleness and not assumption of command should rule her. The word "management" to a loving husba d suggests artifice and unnaturalness. His natural love should be his mentor in treating with her, and not prescribed rules. If he is faithful and tender, so shall she be, equally, if not more so.

Manage Yourself First

for the Editor : italf the difficulty in managing a wife can te overcome by the husband managing himself first. He should prove himself worthy of her love and respect by leading a temperate, industrious and moral life. The husband should recognize his wife as his equal, as one whose advice and counsel are to be sought on all affairs relating to the welfare of the famility. When harmony of action cannot be obtained by mutual agreements the husband must assert his right to govern the household. This does not imply that the wife is interior to the husband; but rather that it is a wise rule adopted for the good government of the domestic circle. The husband should never allow his love and affection for his wife to grow cold. Usually the temate heart is gentic, kind and loving and under the sunshine of kind words and loving caresses is capable of developing the strongest and most enduring devotion to the object of its affection. Angry words should never be heard within the sacred precincts of home, and it forbearance, prudence and kindness prevail the occasion for them will never arise.
